Registration Process

1. Send your CV and apply for jobs

Browse our current jobs and register your interest by sending us your CV so we can help you find work.

2. Consultant Review

This is typically a short phone interview with one of our consultants and if your skills and experience match the jobs we typically work on, then we will contact you to book a full registration.

3. Registration

You will need to complete a face to face interview with us so that we can assess your suitability for the roles desired.

At this stage you will be given access to the Stafflex Hub, an online portal where you can record availability, update details, upload compliance documents and view your old timesheets.

4. Job match

You are now fully registered with Stafflex and will work with one of our specialist consultants who will proactively source and match temporary or permanent opportunities against your unique requirements and skills.
